

Restroom Deadbolt Indicator

Shown with the
Schlage B660 Deadbolt

Privacy and
Convenience

Privacy and Convenience

Restrooms need privacy and the Restroom Indicator Deadbolt (RDI) offers it at two levels. The Restroom Deadbolt Indicator conveniently secures the door while the clearly visible status indicator tells others to stay out, helping to prevent those awkward moments.

Deadbolts have long been used as the lock of choice for public restrooms and indicators have long been recognized for their benefits. However, most deadbolts with indicators only offer an inconvenience for the facility owners. Whether emergency entry is required or the restroom needs locked down because of an out-of-service circumstance, looking for and using the odd little keys supplied with all other indicator deadbolts has always been an inconvenience.

The Restroom Indicator Deadbolt (RDI) eliminates this problem. Working with a standard Schlage or Falcon single cylinder deadbolt, it locks and unlocks from the exterior with a standard key. In most cases it can be keyed to fit into a facility's master key system, offering a convenience above the rest.

Whether it is a school, a senior care facility, a retail establishment, or a restaurant, any facility with a public restroom can benefit from the privacy and convenience the installation of a Restroom Indicator Deadbolt (RDI) supplies.
